## Enhancements

#	Module	Description
16743	Analytics	Addition of a field in article attributes to use as an Analytics tracking parameter. This is to allow links displayed via the dynamic content widget module to be tracked.
15715	Article Tags	Added a Related Items tag allowing publishers to place them anywhere on the article or template and render associated files and articles as a list that can be styled.
17355	Blogs	<ul style="list-style-type: none"> <li>• Blog listing shows number of comments</li> <li>• Modified "Add Blog" button text to "Add Post"</li> <li>• Removed comma from date archive list</li> <li>• Modified breadcrumbs so they take you back to the blog from a detailed post page. Works with the breadcrumbs tag as well</li> <li>• Removed the Back button from the post detail page</li> <li>• Blog post title on list page is using the folder's public name instead of admin</li> </ul>
	Content Organiser	<ul style="list-style-type: none"> <li>• Package specific Masterpages</li> <li>• Package specific nominated articles</li> <li>• Ability to export and import package content</li> <li>• Page numbering</li> <li>• Automatic menu per section</li> </ul>
16869	Editor	Added config option which allows the height of the editor canvas to be set in Global Site Settings. Default setting is 500px
	Email Publishing	<b>New Module</b> Added the ability publish an article by sending content in an email to a specially configured mailbox. Also caters for documents images attached to the email and uses templates.
16672	TRIM Integration	<b>New Module</b> Integration with HP TRIM Document Management System allowing users to insert links in the editor to TRIM documents
16683	Mailing List	<ul style="list-style-type: none"> <li>• Added additional nominated articles for signup and edit modes in the subscribe page</li> <li>• Confirmation email is now a nominated article</li> <li>• Once signed up the user is directed to a nominated article, not back to the sign up page with their details.</li> <li>• Added a subscriber logout button</li> <li>• Added some instructions on how to retrieve the password from the mailing list subscriber login page</li> </ul>
11357	Microsoft Office Integration	<b>New Module</b> Add-in for Office 2007 allowing users to open and save Word, Excel and Powerpoint content from Community Manager document library
17281	My Account	Modified behaviour so user does not have to login if clicking on alert link from email
	Office Communicator (OCS) Integration	<b>New Module</b> Integration with the Microsoft Office Communicator Server allowing users to display OCS presence indicators in Articles and the Corporate Directory
	SharePoint Integration	<b>New Module</b> Integration with Microsoft Office SharePoint 2007 pages, documents and images, allowing users to map SharePoint locations to CommunityManager folders and

		synchronise the content within them.
15273	Store Locator	<ul style="list-style-type: none"> <li>• Insert Store Locator Widget into article</li> <li>• Retrieve store data by store type, brand, state, country or taxonomy</li> <li>• Configure widget to optionally display on map the description, address, telephone, fax and email from store record</li> <li>• Option to display results list and/or map</li> <li>• Detail page display for individual locations</li> <li>• Display sortable a-z index of locations</li> </ul>
16674	Workflow	<p>The ability to set workflow basket owners to <b>variable</b> using one of the following options...</p> <ul style="list-style-type: none"> <li>• Set individual basket owners for each folder</li> <li>• Allow user to pick basket owners from a list of available approvers</li> <li>• Automatically route to users manager</li> </ul>

## Issues Resolved

#	Module	Description
17239	Alerts	Added validation to the alerts setup page to ensure that user selects/adds at least 1 alert before saving
16008	Article Attributes	Previously when clicking cancel in article attributes the article remains checked out. We have added an <i>undo checkout</i> to the attributes page which reverses any changes and checks the page back in. Does not create a new version.
17355	Blogs	Blog heading on blog list page shows folder's public name and not the admin name.
17444	Content Organiser	Modified behaviour of "default email subject" logic. It is now a button which sets the value to a default value when clicked.
16509	Document Manager	Resolved issue with document title not supporting multi-lingual characters
17486 17487	EShop	<ul style="list-style-type: none"> <li>Resolved issue when assigning "New Role"</li> <li>Resolved issue with manufacturers not deleting</li> </ul>
16783 15779	Events	<ul style="list-style-type: none"> <li>Resolved issues with Events long description field not supporting multi-lingual characters</li> <li>Resolved issue with Event search results error when displaying large set of search results</li> </ul>
16843	Form Creator	Resolved issue when generating a User Forms Report and the filter did not show any filter options
17158	Menu	Resolved issue with the menu when setting the maximum display level for a menu for a nested folder
15027	Menu	Resolved issue with "edit your own" menu item not saving in the Firefox and Chrome browser
17239	My Account	Added validation to the alerts setup page to ensure that user selects/adds at least 1 alert before being able to save
16566 17516	Workflow	<ul style="list-style-type: none"> <li>Resolved issue in workflow when items approved but inbox still showing as 1</li> <li>Resolved issue of add/remove basket button not displaying in IE 6 / 8 browsers</li> </ul>
