Enhancements

#	Module	Description
11302 15897	Form Creator	<ul style="list-style-type: none"> Added the ability to insert a CAPTCHA element (a challenge-response test to ensure that the response is not generated by a computer) on form creator forms. Admin has the option to show CAPTCHA on first or second attempt. Added the option to automatically add an email address, opt in confirmation, first name and last name captured in a form to a specified mailing list.
13513	Design and Layout	<p>Added a link to the System style sheets and Custom Javascript under the Design and Layout menu. These include...</p> <ul style="list-style-type: none"> ArticleEditing.css CustomClientStyles.css PrintToPdf.css admin.css ETQStyle.css PreCustomJavaScript.js PostCustomJavaScript.js LocatorStyles.css login.css errorpage.css forgottenpassword.css denied.css changepassword.css articlenotfound.css Phonebook/default.css Phonebook/customclientphonebook.css StylesArticleEdit.css AdminUnskinned.css EditorContentAreaStyles.css
14597	Document Manager	Modified code behind "open in new window" to remove use of unnecessary JavaScript. It will now use target = _blank to open a new window.
15088	Links	Added option to inject Google Analytics tracking code to individual article, folder and document links.
15293	SDK	Enhancement to the Elcom Software Development Kit (SDK) to allow client and partner developers to create custom page elements that can utilise the full power of the ASP.NET page lifecycle
15299	Custom Stylesheets	Added version control / check in / out functionality to custom stylesheets.
15333 16054	Workflow	<ul style="list-style-type: none"> Added a secondary basket owner. If the primary basket owner is out of the office the secondary basket owner will become responsible for the item. Users can now set themselves as "out of office" via the user details page. Improved Workflow preview mode. Now displays content exactly how it will appear on the live site.
15571	Security	<ul style="list-style-type: none"> After x unsuccessful attempts the account and IP address combination will be locked out for a specified period of time. Lockout duration, number of attempts and an email address that is notified when someone is locked out can be set in Global site settings > logging in. Added a lockout report which shows IP address, username, date/time locked out and date time lock out ends

		<ul style="list-style-type: none"> Added an option to turn off password auto-complete in Global Site Settings > miscellaneous
15970	Breadcrumbs	Added option in Global Site Settings to enable or disable behaviour of final breadcrumb i.e. to make it a clickable link or regular text.
16005	Events	If a response is not received from the payment gateway during event registration the system will capture the registration in a transaction error log table.
16016	Editor	Added option in Global Site Settings to enable or disable automatic conversion to XHTML in the content editor.
15670	Mailing List (Reports)	Added an 'Export to Excel' option for mailing list subscribers which displays Mailing List Name(s), Subscriber Last Name, Subscriber First Name, Email Address, Company Name, Status, Unsubscribe Reason (if applicable)
15085	My Account > Alerts	<ul style="list-style-type: none"> Changed the Alerts Tab from 'Subscription' to 'Alerts' Setup pre-defined 'quick alerts' Changed alert function to only send once even if the user has not clicked it Links now go directly to alert content as opposed the alerts page In alerts screen the alert link will now open normal browser window i.e. no fixed height and width Added the ability to supply a link in an email to promote an alert. If clicked the user will first be prompted to register and then be taken to the Alerts page. Provided the ability to enhance the look of the content alert email through use of nominated articles. Ability to change the subject line of the Alert email

Issues Resolved

#	Module	Description
14811	Widgets	Multimedia Widgets were using the AGLS Metadata Title as alt text on the thumbnail images and as the heading on the player window. It will now use Document Title.
15081	Form Creator	Previous to version 6.10 form creator email recipients were visibly hidden but still appeared in view source mode. Email addresses are now completely removed from the source code.
15184 15528	Training Manager	Training Attendance Reports modified to open in new window Resolved issue of closed events appearing in course list
15336	eShop	Changed the logic for inheritance on widget to check for product ID in the querystring first before checking if it is an article
15373 15646 15647	Editor	<ul style="list-style-type: none"> Table outline borders are now displaying After running the spellchecker misspelled words are highlighted in yellow The default behaviour for right click has reverted to cut/copy/paste Image right click now showing image properties Insert link to article/folder now working in Firefox browser
